

MOST SUPPORTED IDEAS AND CONCEPTS:

October 2019

Heated and Indoor Pool Facilities:
the most commonly sought after experience was a heated pool, the opportunity to use the pool more often and to be fully or partly covered.

Range of aquatic experiences:
learning to swim was a higher priority for adult learners and children alike; as was the desire to have an area to cool off on a summer's night, or get some laps in before work.

A wide variety of programs and activities for all age groups:
requests ranged from large scale events, to a summer cinema series to being able to book a space to host your child's birthday party. The community is looking for even more entertainment.

Outdoor recreational facilities and green spaces:
the grassed areas and tree lined spaces are valued by the community who would like to see more opportunities to enjoy the facility as they would a park or outdoor space.

Updated and refurbished amenities:
everyone was agreed the facilities need an upgrade and would like to see modified change rooms, including women only and new/upgrade locker system. Community would also like free WiFi included.

Multicultural consideration and inclusion:
bringing the character of the area, its people past and present is important for the people of Doveton who would like to see this detailed integrated in both the design and the programming.
