

## Parkside Boulevard Reserve Playground Upgrade

The Parkside Boulevard Reserve Playground upgrade reimagines the existing playground, with a unique set of play opportunities within the existing fenced areas. Retaining the existing playground footprint, the top section offers a new double swing and a senior combination unit featuring a slide, monkey bars, climbing pole, ladder, and rope play. On the lower end, there is a new nest swing and junior combination unit with 2 slides, a climbing wall, twisted ladder, plank bridge, fireman's pole, and monkey bars. Bringing the two playgrounds together is a new central path with secondary paths to each play area. Garden beds, stabilising rock work and balancing logs have also been included to create both play and social spaces. Additional garden beds, trees, play logs, and rock work provide shade and can be found throughout the playground with log steppers providing secondary path connections through garden beds.
