Development Type	Levy (July 2022)	Unit
Residential and Activity Centre	\$847,411.54	per hectare NDA

1. INTRODUCTION

1.1. BACKGROUND

This Collison Estate Development Contributions Plan (**DCP**) has been developed to formalise the funding of shared infrastructure to support the development of Collison Estate in Cranbourne East.

The DCP supports the objectives of the Planning Policy Framework, particularly Clause 19.03-1S, the objective of which is "to facilitate the timely provision of planned infrastructure to communities through the preparation and implementation of development contributions plans and infrastructure contributions plans".

The delivery of key infrastructure in a timely and efficient manner is fundamental to sustainable outcomes in future residential areas such as Collison Estate.

The DCP forms part of a package of documents that informs the finalisation of a new Collison Estate Development Plan and a Planning Scheme Amendment that introduces the Development Contributions Plan Overlay (**DCPO**) to Collison Estate.

1.2. COLLISON ESTATE

Collison Estate is a semi-rural area in Cranbourne East within the City of Casey. Existing land use within the Estate is generally a mixture of low density residential and small-scale agricultural use.

All land within the Collison Estate is subject to Schedule 22 to the Development Plan Overlay (**DPO22**). This area is referred to as the **DCP area** and is generally bound by Casey Fields Boulevard to the west, Berwick-Cranbourne Road to the south, Linsell Boulevard to the north, and a developing residential estate to the east known as Selandra Rise.

The DCP area is zoned General Residential Zone – Schedule 1 (**GRZ1**) under the *Casey Planning Scheme* and is comprised of 94 individual land properties with an overall land area of 83.0778 hectares. Landownership within the DCP area is currently highly fragmented, stemming from the previous Low Density Residential Zone (rezoned in 2010) and associated subdivision pattern. This feature of the area creates infrastructure delivery and co-ordination challenges which have influenced the preparation of this DCP.

The boundaries of the DCP area (also referred to as the Main Catchment Area (MCA)) are shown in Figure 1.

1.3. DCP TIMEFRAME

For the purposes of this DCP a 30 year timeframe has been adopted. This period commences from the date that the DCP is incorporated into the *Casey Planning Scheme*.

A longer timeframe has been adopted due to the highly fragmented nature of the DCP area, which generally results in slower development rates than areas with consolidated owners. It is expected that the precinct with take some time to develop given this context.

2. STATUTORY FRAMEWORK

2.1. INTRODUCTION

This DCP is to be incorporated into the *Casey Planning Scheme* and complies with the statutory framework guiding the preparation and management of Development Contributions Plans in Victoria which is summarised below.

2.2. PLANNING AND ENVIRONMENT ACT

Part 3B of the *Planning and Environment Act 1987* outlines the statutory provisions relating to development contributions. In summary, Part 3B provides for, amongst other things:

- The inclusion of a DCP in the planning scheme, for the purpose of levying contributions for the provision of works, services and facilities (section 46I);
- The opportunity to impose a Development Infrastructure Levy, Community Infrastructure Levy or both (section 46J);
- The contents required of a DCP (section 46K);
- The setting of limits in respect of a Community Infrastructure Levy. In the case of the construction of a dwelling, the Community Infrastructure Levy must not exceed \$1,253 (2022-23 financial year) per dwelling (section 46L);
- The provision for the Minister to issue written directions relating to the preparation and content of a DCP (section 46M); and
- The collection of a Development Infrastructure Levy, by way of a condition on a planning permit either requiring the payment of a levy within a specified time, or entering into an agreement to pay the levy within a specified time (section 46N).

The Act states that "a development contributions plan must-

- (a) specify the area to which it applies; and
- (b) set out the plan preparation costs, works, services and facilities to be funded through the plan, including the staging of the provision of the works, services or facilities; and
- (c) relate the need for the plan preparation costs, works, services and facilities to the proposed development of land in the area; and
- (d) specify in respect of each of the plan preparation costs, works, services and facilities
 - i. the amount of the plan preparation costs and the estimated cost of the works, services or facilities; or
 - ii. the standard levy applicable to the plan preparation costs, works, services or facilities; and
- (e) unless a standard levy is applied, specify the proportion of the total estimated cost of the plan preparation costs, works, services and facilities which is to be funded by a development infrastructure levy or community infrastructure levy or both; and
- (f) specify the land in the area and the types of development in respect of which a levy is payable and the method for determining the amount of levy payable in respect of any development of land; and
- (fa) specify the Minister, public authority or municipal council to whom or to which the community infrastructure levy or development infrastructure levy is payable under this Part (the *collecting agency*); and
- (fb) specify any Minister, public authority or municipal council that is to be responsible for the provision of the works, services or facilities or for the plan preparation costs for which the community infrastructure levy or development infrastructure levy or part of that levy is payable under this Part (the *development agency*); and
- (g) provide for the procedures for the collection of a development infrastructure levy in respect of any development for which a permit under this Act is not required."

Information on each required content of a DCP is provided in this document.

2.3. MINISTERIAL DIRECTION

The Ministerial Direction on the Preparation and Content of Development Contributions Plans (11 October 2016):

- Defines certain terms relevant to DCPs;
- Limits the application of DCPs to areas where the Infrastructure Contributions Plan system does not apply;
- Specifies that non-government schools and public housing is exempt from DCP levies;
- Specifies the infrastructure types which may be funded through a development contribution levy;
- Provides for Ministerial exemptions to the Direction; and
- Sets out the reporting requirements of Collecting Agencies and Development Agencies.

The Ministerial Direction sets out the types of works, services or facilities may be funded from a development infrastructure levy as follows:

- "Acquisition of land for roads, public transport corridors, drainage, public open space and community facilities;
- Construction of roads, including the construction of bicycle and foot paths, and traffic management and control devices;
- Construction of public transport infrastructure, including fixed rail infrastructure, railway stations, bus stops and tram stops;
- Basic improvements to public open space, including earthworks, landscaping, fencing, seating a playground equipment;
- Drainage works; and
- Buildings and works for or associated with the construction of a maternal and child health care centre, child care centre, kindergarten, or any centre which provides these facilities in combination."

In addition to the above categories which can be funded under a Development Infrastructure Levy, a Community Infrastructure Levy may also be collected towards items which do not fall within these categories. The Community Infrastructure Levy is currently capped at \$1,253 per dwelling (2022-23 financial year), and is typically used to fund Council buildings and facilities such as:

- Libraries;
- Community meeting rooms, senior citizens centres and youth centres;
- Pavilions for active (structured) sporting reserves; and
- Leisure Centres.

This DCP only funds works which can be categorised as Development Infrastructure Levy items. There are no Community Infrastructure Levy items in this DCP.

2.4. DEVELOPMENT CONTRIBUTIONS GUIDELINES

The Development Contributions Guidelines (2007) include the following relevant points relating to the types of infrastructure that can be included in a DCP:

- A DCP may include infrastructure to be provided by a council or State Government agency. Basic utilities, such
 as water supply and sewerage, provided by servicing authorities under their own legislation cannot be included
 in a DCP.
- The types of projects in a DCP can include the following:
 - a new item of infrastructure
 - an upgrade in the standard of provision of an existing infrastructure item
 - an extension to an existing facility, or
 - the total replacement of an infrastructure item after it has reached the end of its economic life.
- A DCP cannot be used to fund the total replacement of an infrastructure item, if the replacement is necessary as a result of poor maintenance.
- It is not appropriate to include existing infrastructure in a DCP that was funded through general taxes or rates.
- The following costs can be included in the calculation of levies:
 - the capital costs of providing the infrastructure projects;
 - the cost of financing the infrastructure projects, if provided early in the life of the DCP;
 - the design costs associated with the infrastructure projects, and
 - the cost of preparing and approving the DCP.
- Recurrent costs such as maintenance and operating costs or costs associated with the administration of the DCP cannot be included in the calculation of a development contributions levy.

In order to ensure that equity is maintained, development contributions cannot be collected for infrastructure that may also be funded through another user-pays mechanism (such as public open space contributions). The avoidance of this "double-dipping" is a key consideration when selecting an infrastructure list.

Preparation of this DCP has had regard to the recommended approaches set out in the DCP Guidelines.

3. PROPOSED DEVELOPMENT

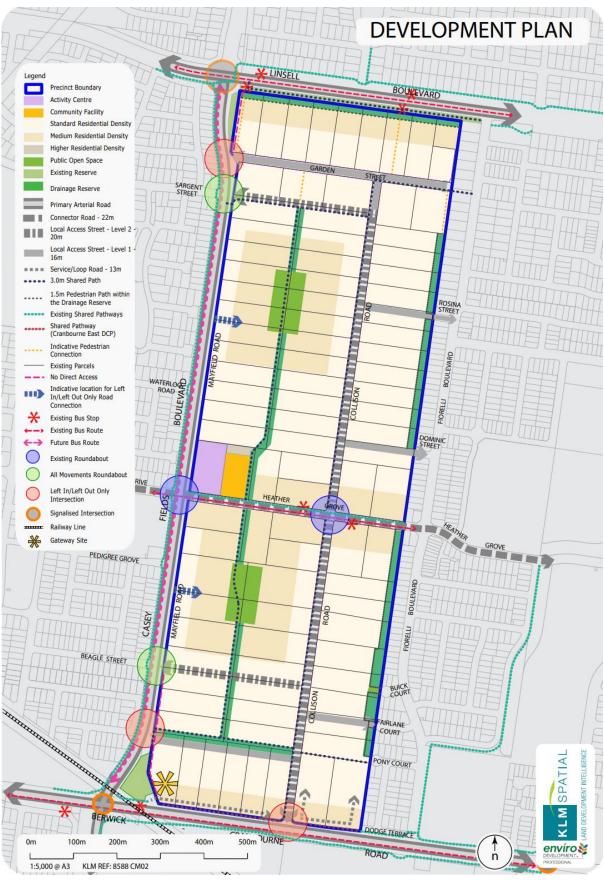

3.1. OVERVIEW

A Development Plan has been prepared to guide development of all land within the DCP area. The Collison Estate Development Plan (May 2021) was prepared by KLM Spatial and Casey City Council, and seeks to facilitate residential development across the entire precinct, along with an activity centre.

The Development Plan is shown in Figure 2.

F2. DEVELOPMENT PLAN

Source: Collison Estate Development Plan (December 2022).

3.2. LAND BUDGET

The DCP land budget is summarised in Table 2. The DCP area has a total area of 83.0778 hectares and a Net Developable Area (NDA) of 69.2866 hectares.

All land except existing roads is defined as 'developable' - this land is shown in Table 2 as Gross Developable Area.

Some of this land is required for public infrastructure, including roads, drainage, community facilities and open space - this land is secured through either the DCP or Clause 53.01 (Public Open Space Contributions and Subdivision) of the Casey Planning Scheme. Details of each section of land required for public purposes are provided in Section 4.

T2. LAND BUDGET SUMMARY

Land Budget	Area (HA)	% of site area	% of GDA	% of contribution area
DCP Area	83.0778			
Existing Roads	4.9900	6.0%		
Gross Developable Area (GDA)	78.0878	94.0%	100.0%	
Land required for roads (DCP)	1.3347	1.6%	1.7%	
Land required for intersections (DCP)	0.0024	0.0%	0.0%	
Land required for drainage (DCP)	4.9309	5.9%	6.3%	
Land required for community facilities (DCP)	0.6000	0.7%	0.8%	
Contribution Area	71.2198	85.7%	91.2%	
Open Space land (Clause 53.01)	1.9332	2.3%	2.5%	2.71%
Net Developable Area	69.2866	83.4%	88.7%	
Activity Centre	0.8000	1.0%	1.0%	
Net Developable Area - Residential	68.4866	82.4%	87.7%	

Source: Casey City Council (analysed by Urban Enterprise), 2023. Gross Developable Area based on title information provided by Council.

3.3. DEVELOPMENT YIELD

The Development Plan states that Collison Estate is expected to yield 1,635 dwellings, at an average density of approximately 24 dwellings per hectare, and accommodate approximately 5,346 residents based on an average household size of 3.27 people per dwelling.

There is 0.8 hectares allocated for an Activity Centre to service local convenience needs. The Collison Estate Activity Centre Assessment (SGS Economics & Planning, June 2023) provides guidance on land area requirements and floorspace yields for the activity centre. It was estimated that the activity centre yield could be between 2,850 sgm and 4,900 sgm of floorspace, as shown in Table 3.

T3. LAND AREA ALLOCATION FOR POTENTIAL COLLISON ESTATE NAC

	Minimum Floorspace (sqm)	Maximum Floorspace (sqm)
Retail	2,100	3,400
Commercial office / medical suites	750	1,500
Total Floorspace	2,850	4,900
Land Area (ha)	0.8	1.4

Source: SGS Economics and Planning, 2023

4. INFRASTRUCTURE ITEMS

4.1. INTRODUCTION

This section identifies the relationship between the proposed development and the infrastructure required to support development of the DCP area.

4.2. TECHNICAL STUDIES

A number of reports have been prepared to identify the infrastructure items required to support development of the precinct, including roads, intersections, drainage, shared paths and open space.

The key documents that have informed the provision of infrastructure items to be funded by the DCP are:

- Traffic Impact Assessment, Traffix Group, July 2023;
- Collison Estate Cranbourne East Stormwater Strategy, Incitus, April 2019; and
- Social Infrastructure Requirements for Collison Estate, Change Sustainable Solutions, June 2023.

Based on these reports, further details including designs and costings were prepared as summarised in Table 4.

T4. TECHNICAL SOURCE INFORMATION FOR INFRASTRUCTURE ITEMS AND DESIGNS

Category	Technical Report	Detailed Designs
Roads and Intersections	Traffic Impact Assessment, Traffix Group, July 2023	Intersection Designs, Traffix Group, Jan 2020 Linsell Blvd / Casey Field Blvd FLP, G24859-01, Traffix Group, June 2023 Heather Grove Concept Layout Plan, G24859-02, Traffix Group, May 2023
Drainage	Collison Estate Cranbourne East Stormwater Strategy Revision 4, Incitus, March 2020 Stormwater Management Strategy – Collison Estate, KLM Spatial, March 2021	Stormwater Management Strategy – Collison Estate, KLM Spatial, March 2021
Community Facilities	Social Infrastructure Requirements for Collison Estate, Change Sustainable Solutions, June 2023	No detailed design available, scope described in Social Infrastructure Requirements for Collison Estate document.

Source: Urban Enterprise.

4.3. DCP ITEMS

The Technical Reports identify the need for a range of road, drainage and community items required to support development of the DCP area.

Decisions have been made about the infrastructure items which are to be funded by this DCP having regard to statutory framework for DCPs in Victoria. The guiding principles for selection of DCP items are:

- Items are needed to provide for the wellbeing, health and safety of the future residents of Collison Estate; and
- Items benefit the entire DCP area; and/or
- Items require co-ordinated delivery that would be challenging to implement if not included in the DCP.

The highly fragmented land ownership across the DCP area is a particularly relevant consideration which has guided the identification of infrastructure items to be included in the DCP. In particular, delivery of the road and drainage network will require land and works to be delivered within and adjacent to many individual properties which are likely to develop at different times. For this reason, this DCP includes infrastructure items that are often excluded from larger greenfield DCPs, such as certain access roads and a linear drainage network.

The resulting levies are also higher than many other DCPs given the inclusion of a wider range of infrastructure items.

NUMBER AND LOCATION OF ITEMS

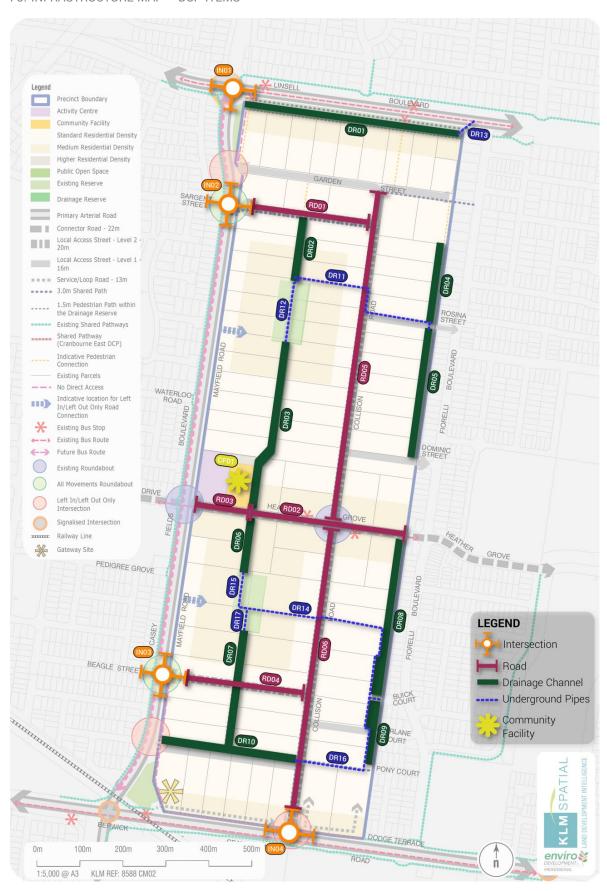

The DCP applies to 30 infrastructure items and enables collection of levies to ensure that the required shared infrastructure can be practically delivered when it is needed by the community, and that all shared infrastructure costs are equitably apportioned.

The location of each DCP item is shown on the map in Figure 3. Tables 5 to 8 provide a summary of the infrastructure items in the DCP within the categories of:

- Transport (roads and intersections, and associated land);
- Drainage (works and associated land); and
- Community facilities (works and associated land).

In addition to physical infrastructure, the DCP also funds planning costs.

F3. INFRASTRUCTURE MAP - DCP ITEMS

Source: Urban Enterprise

4.4. TRANSPORT ITEMS

The DCP area is served by an existing road network, however this network requires upgrades to facilitate urban development, as well as construction of two new Level 2 Local Access Roads through fragmented land.

In terms of transport infrastructure, the DCP funds:

- A contribution to the signalisation of the existing intersection of Linsell Boulevard and Casey Fields Boulevard (IN-01) see Appendix D for more details.
- Upgrades to existing Heather Grove and Collison Road, and their intersections with the arterial road network;
- New Local Access Level 2 roads (land and construction) and associated intersections to the arterial network.

Local roads (level 1) are to be funded by developers as part of subdivision works.

Transport infrastructure items are summarised in Table 5.

T5. TRANSPORT PROJECTS

Project ID	Project Title / Description	Construction / Land / Other
Roads Proje	ects	
RD01	Sargent Street - Land and construction of Sargent Street as a Local Access - Level 2 road (0.5873 hectares)	Land & Construction
RD02	Heather Grove - Land and upgrade of Heather Grove to a Connector Road standard (2m widening) (0.0925 hectares).	Land & Construction
RD03	Heather Grove - Land and upgrade of Heather Grove fronting 1 Heather Grove to a 'Main Street' (land included in RD-02)	Land & Construction
RD04	Beagle Street – Land and construction of Beagle Street as a Local Access - Level 2 road standard (0.6567 hectares).	Land & Construction
RD05	Collison Road North - Upgrade of Collison Road North to a Local Access - Level 2 road standard.	Construction
RD06	Collison Road South - Upgrade of Collison Road South to a Local Access - Level 2 road standard.	Construction
Intersection Projects		
IN01	Linsell Boulevard and Casey Fields Boulevard - Land and construction of signalised intersection (0.0006 hectares).	Land & Construction
IN02	Sargent Road and Casey Fields Boulevard - Construction of a roundabout.	Construction
IN03	Beagle Street and Casey Fields Boulevard - Construction of a roundabout.	Construction
IN04	Collison Road and Berwick-Cranbourne Road - Left in/left out intersection.	Construction

4.5. DRAINAGE ITEMS

The Stormwater Management Plan recommended a network of linear drainage reserves and works to distribute land required for drainage purposes in the context of fragmented land ownership. One of the primary reasons for this network design is its flexibility to enable drainage infrastructure to be delivered 'out of sequence', if neccessary.

The DCP includes three drainage project types:

- Land for drainage channels on private land which is needed to convey stormwater flow to the designated outfall points and for stormwater retention;
- Construction of works within drainage channels to facilitate stormwater flow; and
- Construction of underground pipes needed to connect all properties and channels to the network.

These projects form a package of works which enable development within 10 separate drainage sub-catchments. A map showing detailed catchments and drainage components is provided in Appendix C.

Drainage items are summarised in Table 6.

T6. DRAINAGE PROJECTS

Project ID	Project Title / Description	Construction / Land / Other
DR01	Drainage channel A - Land and construction of drainage channel (0.7038 hectares).	Land & Construction
DR02	Drainage channel B - Land and construction of drainage channel (0.2706 hectares).	Land & Construction
DR03	Drainage channel C - Land and construction of drainage channel (0.7475 hectares).	Land & Construction
DR04	Drainage channel D - Land and construction of drainage channel (0.3394 hectares).	Land & Construction
DR05	Drainage channel E - Land and construction of drainage channel (0.5536 hectares).	Land & Construction
DR06	Drainage channel F - Land and construction of drainage channel (0.2323 hectares).	Land & Construction
DR07	Drainage channel G - Land and construction of drainage channel (0.4546 hectares).	Land & Construction
DR08	Drainage channel H - Land and construction of drainage channel (0.7384 hectares).	Land & Construction
DR09	Drainage channel I - Land and construction of drainage channel (0.2979 hectares).	Land & Construction
DR10	Drainage channel J - Land and construction of drainage channel (0.5927 hectares).	Land & Construction
DR11	Underground pipes - Channel B to outlet (1050Ø @ 391.6 linear metres).	Construction
DR12	Underground pipes - Channel C to Channel B pipe (7500 @ 148.9 linear metres).	Construction
DR13	Underground pipes - Channel A to outlet (6000 @ 46.6m linear metres).	Construction
DR14	Underground pipes - South POS to outlet (750Ø @ 502.2 linear metres).	Construction
DR15	Underground pipes - Channel F to South POS (525Ø @ 99.45 linear metres).	Construction
DR16	Underground pipes - Channel J to outlet - (525Ø @259.2 linear metres).	Construction
DR17	Underground pipes - Channel G to South POS (525Ø @ 53.65 linear metres).	Construction

4.6. COMMUNITY FACILITIES

One community facility (early years centre) is funded through the DCP, including land and construction. Details are provided in Table 7.

T7. COMMUNITY FACILITY PROJECTS

Project ID	Project Title / Description	Construction / Land / Other
CF01	Community FacilityLand and construction of centre to include three kindergarten rooms, two	Land & Construction
0. 0.	maternal and child health rooms and flexible community rooms (0.6 hectares).	24.14 & 33.134 434.311

4.7. OTHER DCP PROJECTS

Two other projects are funded through the DCP:

- Council incurred costs on behalf of and to the benefit of all landowners in the DCP area relating to the preparation of the DCP and associated studies.
- Landowners incurred costs on behalf of and to the benefit of all landowners in the DCP area relating to the preparation of the Collison Estate Development Plan and associated studies.

T8. OTHER DCP PROJECTS

Project ID	Project Title / Description	Construction / Land / Other
PR01	Development Contributions Plan Preparation Costs – Planning preparation costs incurred in relation to preparation of the DCP.	Other
PR02	Development Plan Preparation Costs – Planning preparation costs incurred in relation to preparation of the Development Plan.	Other

4.8. TIMING

Given the fragmented nature of land ownership in Collison Estate, the timing the infrastructure delivery is flexible to respond to the timing and located of development as it progresses.

Some infrastructure items have specific delivery triggers as follows:

- **IN01**: Prior to Statement of Compliance for the 680th lot within the Estate or at Council's discretion having regard to the timing of funds available from the Cranbourne East DCP to deliver the item;
- IN04: Once Collison Road South is upgraded and requiring connection to Berwick-Cranbourne Road; and
- **CF01**: Prior to the 800th household in the Estate or 500th household south of Heather Grove, whichever occurs first.

4.9. ITEMS NOT FUNDED BY THE DCP

The DCP does not fund the following items which are to be delivered by developers:

- Internal streets and associated traffic management measures, except where specified as DCP projects;
- Intersections connecting the development to the existing and planned road network, except where specified as DCP projects;
- Water, sewerage, underground power, gas, and telecommunications services, except where specified as DCP projects;
- Stormwater drainage and water quality works, except where specified as DCP projects;
- Local pathways and connections to the regional and/or district pathway network, except where specified as DCP projects;
- Basic levelling, seeding, water tapping and landscaping of local parks, except where specified as DCP projects;
- Local park masterplans and any agreed associated works required by the ordinance package, except where specified as DCP projects; and
- Bus stops.

The items listed above are considered to be normal to the construction of a development and are not considered to warrant cost sharing arrangements beyond those set out in this DCP.

PUBLIC OPEN SPACE CONTRIBUTIONS

The *Casey Planning Scheme* (at Clause 53.01 Public Open Space Contributions and Subdivision) requires any subdivision within the area defined as "CR5" (including Collison Estate) to make a public open space contribution of 5%.

This DCP does not include any public open space items – all open space land and improvements shown on the Development Plan are to be secured through Clause 53.01.

In some cases, the proportion of land to be provided as public open space in accordance with the Development Plan may exceed the required contribution under Clause 53.01 (i.e. 5%). In these cases, the relevant landowners will be compensated by Council for any over-provision which will be secured through a separate section 173 agreement. Where the proportion of land to be provided as public open space is less than the required contribution under Clause 53.01, the relevant landowners will be required to pay the balance of the contribution to Council in accordance with Clause 53.01.

5. LEVY CALCULATION

5.1. INTRODUCTION

The method and results of levy calculations are described in this section.

5.2. PROJECT CATEGORISATION

In accordance with the Ministerial Direction, each item has been categorised as being funded by Development Infrastructure Levy (DIL) or the Community Infrastructure Levy (CIL).

In this DCP, all items are categorised as DIL, therefore no CIL is applicable.

5.3. PROJECT COSTS AND APPORTIONMENT

COSTS

Each item in the DCP has a cost specified for either capital works or land. Cost estimates were prepared by technical study authors, Casey City Council or land valuation experts.

DCP item costs are expressed in July 2022 values and will be indexed annually in accordance with the method specified in this DCP. Detailed cost estimates are provided in Appendix B.

APPORTIONMENT

The approach to apportioning the cost of each DCP infrastructure item relies on the nexus principle. The DCP area is deemed to have a nexus with an infrastructure item if the residents within the DCP area are likely to make use of the infrastructure item.

This DCP apportions costs to all new development (residential and activity centre) within the MCA based upon the likelihood that an item will be used by residents within and external to the MCA. Costs are shared in accordance with the projected development outcomes and an estimated shared of use of each infrastructure project.

The proportion of costs attributable to external use is subtracted from the total project cost of an infrastructure item to give the cost attributable to the MCA for each infrastructure item. Two items (IN01 – Linsell Boulevard and Casey Fields Boulevard, and CF01 – Community Facility) are identified as having external apportionment based on the catchment for the items including development outside the MCA. The Development Agency will fund any costs not collected through the DCP, or other DCPs / ICPs, for these items.

It is noted that infrastructure contributions have been collected for IN01 through the Cranbourne East DCP and are also expected to be collected through the future Croskell ICP. Collison Estate will only make contributions to the apportioned cost of works defined in this DCP.

For each item in the DCP, the item cost and the cost apportioned to the MCA is specified in Table 11.

5.4. LEVY CALCULATION

DEMAND UNITS

In order to calculate a levy, the cost apportioned to the MCA must be converted into a levy per demand unit. The most common demand unit type in residential growth areas is an area measure, such as Net Developable hectares.

In Collision Estate, almost all land is proposed to be developed for residential purposes. Although some non-residential uses may be permitted in certain areas, the default land use and zoning is residential.

Therefore, in order to fairly levy developers while maintaining financial certainty for Council, a standard 'per hectare of net developable land' (i.e. NDA) demand unit is used for levies applied to all development (residential and activity centre) in this DCP. Table 9 shows the total number of demand units used to calculated levies.

T9. DEMAND UNITS

Levy Type	Unit	Demand Units
Development Infrastructure Levy	NDA	69.29

Source: Casey City Council, 2021.

LEVIES

The total cost attributable to the MCA for each infrastructure item is divided by the number of demand units for that item to calculate the levy for each item as shown in Table 11.

The levy amounts for each item are then aggregated to form an overall levy per demand unit for the MCA.

Table 10 summarises the overall cost apportioned to the DCP and the resulting levies per hectares of NDA to be paid by all development within the MCA (residential and activity centre).

T10. SUMMARY OF COSTS AND LEVIES (JULY 2022 DOLLARS)

Levy type	Cost apportioned to MCA	Levy per ha NDA
Development Infrastructure Levy (DIL)	\$58,714,299.53	\$847,411.54
Community Infrastructure Levy (CIL)	\$0.00	\$0.00

6. IMPLEMENTATION

6.1. INDEXATION OF LEVIES

Capital costs of all infrastructure items in this DCP are in July 2022 dollars and will be indexed by the Collecting Agency annually to account for inflation.

In relation to the cost of infrastructure items other than land, the cost must be adjusted and the contribution amounts recalculated according to the following methods:

- Roads, intersections and bridges in line with the Australia Bureau of Statistics Producer Price Indexes, Road and Bridge Construction Index, Victoria.
- All other infrastructure items in line with the Australia Bureau of Statistics Producer Price Indexes, Non-Residential Building Construction Index, Victoria.

The revised infrastructure costs and the adjustment of the contributions must be calculated as at 1 July in each year.

Land values will be adjusted on 1 July every year following a revaluation by a registered valuer of properties with land required by the DCP. The valuation must be undertaken using the same method and principles as the original DCP.

The Collecting Agency will publish the amended contributions on the Collecting Agency's website within 14 days of the adjustments.

6.2. VALUATION OF LAND

Valuations for land to be acquired under this DCP were prepared by Westlink Consulting on 1 July 2022. Land to be acquired was valued based on the 'before and after method'.

6.3. COLLECTING AGENCY

The Casey City Council is the Collecting Agency pursuant to section 46K of the *Planning and Environment Act* (1987).

6.4. DEVELOPMENT AGENCY

The Casey City Council is the Development Agency for all infrastructure items pursuant to section 46K of the *Planning and Environment Act* (1987).

6.5. COLLECTION OF LEVIES

The DIL will be payable to and collected by the collecting agency, for the:

- Subdivision of land; or
- Development of land which requires a planning permit; or
- Development of land which does not require a planning permit, as set out in this DCP.

SUBDIVISIONS

In respect of the subdivision of land affected by the DCP, the following applies:

- A requirement may be imposed, including by a planning permit condition requiring payment of the DIL as a precondition to any statement of compliance being issued. This must be paid after certification of the relevant plan of subdivision, but not more than 21 days prior to the issue of a Statement of Compliance for the relevant plan, or otherwise included in an agreement under Section 173 of the Act.
- If a staged subdivision, the DIL will be payable in respect of the NDA within the relevant stage, excluding any residual or balance lot, within 21 days prior to the issue of a Statement of Compliance.
- In respect of any residual or balance lot, the DIL will be incurred upon the subsequent subdivision or development of such lot.

DEVELOPMENT REQUIRING A PLANNING PERMIT

A planning permit for the development of land to which this DCP applies must include a condition requiring the applicant to:

- Pay the DIL to the collecting agency within a time specified by the collecting agency which may include a requirement for payment prior to the commencement of any development or works; or
- Enter into an agreement with the collecting agency to pay the DIL to the collecting agency within the time for payment specified in the agreement.

DEVELOPMENT NOT REQUIRING A PLANNING PERMIT

For a development which does not require a planning permit, the party who proposes to develop the land must:

- Pay the DIL to the collecting agency within a time and in a manner specified by the collecting agency which may include a requirement for payment prior to the commencement of any development or works; or
- Enter into an agreement with the collecting agency to pay the DIL to the collecting agency within the time specified in the agreement.

6.6. EXEMPTIONS

No land or development is exempt from this Development Contributions Plan unless exempt by Legislation or Ministerial Direction or Legal Agreement with Casey City Council or stated below. The following development is exempt from the development contribution:

- Development of land for a non-government school, as defined in Ministerial Direction on the Preparation and Content of Development Contributions Plans of 11 October 2016.
- Development of land for housing provided by or on behalf of the Department of Health and Human Services, as defined in Ministerial Direction on the Preparation and Content of Development Contributions Plans dated 11 October 2016.
- Renovation or alteration to an existing dwelling;
- Reinstatement of a building which has been unintentionally damaged or destroyed.
- Outbuildings no more than 10 square metres in floor area, which are normal to an existing dwelling.
- Fences normal to an existing dwelling.

6.7. ADMINISTRATIVE PROCEDURES

The collecting agency will undertake ongoing accounting and review of this DCP in terms of:

- The relevance of projects listed in the DCP;
- The level of contributions collected;
- The construction costs of infrastructure projects;
- The land costs of infrastructure projects;
- Updating the DCP to reflect any relevant amendments to the Planning and Environment Act (1987), or any new Ministerial Directions relating to development contributions.

A review of this DCP will be prepared every five years during the lifespan of the DCP, resulting in a formal review of DCP content if required to reflect any material changes in policy, development, infrastructure or financial matters.

Funds collected through development contributions will be held in a specific interest-bearing reserve account in accordance with the provisions of the *Planning and Environment Act* (1987). All monies held in this account will be used solely for the provision of infrastructure as itemised in this DCP.

If Council resolves not to proceed with any of the infrastructure projects listed in this DCP, the Collecting Agency will comply with section 46(Q) of the *Planning and Environment Act* (1987).

6.8. PROVISION OF LAND AND WORKS IN-KIND

Payment of development contributions is to be monetary. Alternatively, infrastructure works and land may be provided by developers with a credit provided against their development contribution, subject to the agreement of the collecting agency.

The collecting agency may enter into Section 173 Agreements with landowners to formalise details of infrastructure items to be provided in-kind. All development infrastructure (including land) can be provided in-kind under this agreement with the exception of the Community Facility (CF01) and development contributions planning costs (PR01).

Where a developer intends to undertake any DCP works in-kind, this must first be agreed to by the Collecting Agency. In determining whether to agree to the provision of works in-kind, the collecting agency will have regard to the following:

Only works or land identified in the DCP can be provided in lieu of cash.

- Works must be provided to a standard that generally accords with the DCP unless agreed between the collecting agency and the developer.
- Detailed design must be approved by the collecting agency and generally accord with the standards outlined in the DCP unless agreed by the collecting agency and the developer.
- The construction of works must be completed to the satisfaction of the collecting agency.
- The impact on the DCP must be cost and revenue neutral.

Where the collecting agency agrees that works are to be provided by a developer in lieu of cash contributions:

- The credit for the works provided must equal the value identified in the DCP taking into account the impact of indexation;
- The value of works provided in accordance with the principles outlined above, will be offset against the development contributions liable to be paid by the developer;
- The developer will not be required to make cash payments for contributions until the value of any credits for the provision of agreed works-in-kind are exhausted;
- Where credit for works-in-kind cannot be offset against future levy payments, the developer must be
 reimbursed by the collecting agency for any excess credit at such time that cash to the equal value of the
 excess credit has been received by the collecting agency from other landowners in the Main Catchment Area;
- Where a developer chooses to bring forward works ahead of the scheduled time in the DCP, this can be done provided the impact on the DCP is cost and revenue neutral; and
- Where a developer is in credit against their development contributions liability, this credit will be indexed annually in accordance with the method outlined in Section 7.1.

LAND

As with works-in-kind, the provision of land in-kind would be agreed between the developer and the Collecting Agency pursuant to Section 173 of the *Planning and Environment Act* (1987). The value of the credit will equal the value shown in the DCP, subject to indexation.

	IN-01 - LINSELL BOULEVARD AND CASEY I	FIELDS BOU	LEVARD (v1)		_
Item	Description of Works	Quantity	Unit	Rate	Amount
1.1	All works to be undertaken in accordance with City of Casey's site management and supervisions specifications: * Pre-commencement site inspection and walk through (including photos) of existing site and assets conditions; * Site management, supervision and liaison with public utilities, other contractors, Council officers and general public; * Supply all machinery / plant, labour and materials to establish site compunds, site fencing, signage, environmental and site safety controls; * Set up and administration of QA system incorporating Quality System, Occupational Health & Safety System and Environmental Management Plan; * Construction stakeout of proposed works as denoted on construction plans and * Protect Council, private and public assets within and in vicinity of works site from damage.	1	Item	\$350,000.00	\$350,000.00
1.2	Service Proving - Supply all machinery / plant, labour and materials to locate, mark and prove all existing services in the area (including hand excavation, NDD, Dial Before You Dig and electronic detection or ground penetration radar as required) prior to start of works in accordance with AS 5488.2013.	1	Item	\$35,000.00	\$35,000.00
1.3	Consultations with power authority and application for permit to allow excavation works in close proximity to electrical assets including all works to protect authority assets	1	Item	\$10,000.00	\$10,000.00
1.4	Consultations with power authority and application for permit to allow excavation works in close proximity to high pressure gas including all works to protect authority assets	1	ltem	\$10,000.00	\$10,000.00
1.5	Provision for preparation and submission of Traffic Management Plan(s) / Pedestrian Management Plan(s) and After-hours care plan, after-hours contacts including provision of daily vehicles and pedestrians access during duration of works, installation of all corresponding devices for duration of the project. Contractor to submit Traffic Management Plans to Council for endorsement and provide devices to meet the requirements for duration of works. All traffic and pedestrian management including after-hours care plans are to be undertaken in accordance with AS 1742.3-2009 Manual of Uniform Traffic Control Devices (MUTCD), Part 3: Traffic control for works on roads, Worksite Safety – Traffic management code of practice, Road Safety (Traffic Management) Regulations 2009 and the endorsed traffic management plans. VMS boards to be set up on both sides of the road at least 10 working days prior to commencement of works for road users' information. Please refer to tender documentation and specify your inclusions for this item in the covering letter submitted with this tender. The use of VMS should also be identified on Project Gantt Chart submitted with this tender response. A site inspection by all perspective tenderers is recommended. All work areas to be secured to prevent unauthorised access as part of the after-hours care plan. Road closure will not be considered.	1	Item	\$500,000.00	\$500,000.00
1.6	Remove impacted tree as indicated on plans, clearing, grubbing & trimming including disposal. On-site mulching is encouraged and no on-site burning is permitted. (All relevant tipping fees are the responsibility of the contractor).	1	Item	\$10,000.00	\$10,000.00
2.1	DEMOLITION Saw cut and remove redundant concrete footpath and pram crossings including disposal to a recycling plant or an approved dumping site.	521	sqm	\$30.00	\$15,630.00
2.2	Saw cut and remove redundant concrete kerbing including disposal to a recycling plant or an approved dumping site.	913	m	\$20.00	\$18,260.00

EXCLUSIONS

EXCLUSIONS

Adverse market conditions

Abnormal ground conditions

Non statutory signage

Removal of hazardous materials

Site constraints are not known at the time of this estimate and assumes 'reasonable' building conditions.

Allow escalation of 6% per year from date of estimate

Costs noted above exclude any GST allowance.

Relocation or temporary facilities

Carparking indicative only actual requirements to be confirmed with planning

Land Acquisition Costs

APPENDIX D IN-01 - LINSELL BOULEVARD AND CASEY FIELD BOULEVARD INTERSECTION

The Cranbourne East DCP funds the construction of a 4-way signalised intersection at Linsell Boulevard and Casey Fields Boulevard, based on a plan prepared in 2010 (RD-10 in the Cranbourne East DCP). The plan provided DCP funding for signalisation and works primarily on the east and west approaches. The north and south approach works were limited to stubs. Since that DCP was prepared:

- Planning standards for intersection design have changed;
- Planning for Collison Estate has progressed;
- Planning has commenced for Croskell PSP to the North; and
- The intersection has not been constructed.

This DCP updates the scope and extent of the intersection works to meet the current standards and future proof the intersection design so that it can suitably meet the needs of surrounding precincts.

The cost apportioned to this DCP is the cost of the minor additional works needed to accommodate movements generated by Collison Estate when compared with the scope of works already funded by the Cranbourne East DCP. This was determined by reference to two new FLPs prepared by Traffix Group to reflect current planning standards.

The DCP item has been designed to enable future connections to Croskell PSP but does not fund those future works.
